Revision 1.0

SW

The first revision of the Members Module V1.0 document.

## Table of Contents

1. Function .....	1
2. Install/uninstall .....	1
3. Administration menu .....	1
4. The user side .....	1
5. Blocks .....	2
6. Templates .....	2
7. Module credits .....	4

## 1. Function

The **XOOPS** Members module provides a “member directory” for your website. It enables visitors to search a site’s registered members (note that this functionality is already available to administrators through the *system module -> Find Users*) and provides a large number of options and filters for doing so. It is useful because the main **XOOPS** search engine only searches module contents, it does not search member profiles.

## 2. Install/uninstall

No special measures necessary, follow the standard installation process – extract the “xoopsmembers” folder into the `./modules` directory. Install the module through **Admin -> System Module -> Modules**. Detailed instructions on installing modules are available in the XOOPS Operations Manual.

## 3. Administration menu

There is no administration menu and no configuration options for this module. It is entirely accessed from the user side

## 4. The user side

The Members module is accessed via a link in the main menu. This opens a search form that corresponds to the fields in member’s personal profile (see below). It contains a number of additional fields that allow you to search for members that have joined or logged in before or after a certain date. You can also choose how to order the search results – by user name, email, last login, joined date or number of posts.

The number of members currently registered is displayed at the top of the form (see screenshot on following page). Note that you can get a list of all members by submitting the search form without entering any search criteria.

## 5. Blocks

There are no blocks for this module. However, the System Module has three members-type blocks that may be of use: “New Members”, “Who’s Online” and “Top Posters”

## 6. Templates

There are two templates for this module, accessible through **Admin -> System -> Templates -> Members**.

- `xoopsmembers_searchform.html`: Displays the form for searching the member directory (See Figure 1, “Search form” [3]).
- `xoopsmembers_searchresults.html`: Displays the results of a search in a table (See Figure 2, “Search results” [4]).

## Search Members

(Total: 2 members)

<b>User Name</b>	Starts with <input type="text"/>
<b>Real Name</b>	Starts with <input type="text"/>
<b>Email</b>	Starts with <input type="text"/>
<b>ICQ Number</b>	Starts with <input type="text"/>
<b>AIM Handle</b>	Starts with <input type="text"/>
<b>YIM Handle</b>	Starts with <input type="text"/>
<b>MSNM Handle</b>	Starts with <input type="text"/>
<b>URL contains</b>	<input type="text"/>
<b>Location contains</b>	<input type="text"/>
<b>Occupation contains</b>	<input type="text"/>
<b>Interest contains</b>	<input type="text"/>
<b>Last login is more than X days ago</b>	<input type="text"/>
<b>Last login is less than X days ago</b>	<input type="text"/>
<b>Joined date is more than X days ago</b>	<input type="text"/>
<b>Number of Posts is greater than X</b>	<input type="text"/>
<b>Number of Posts is less than X</b>	<input type="text"/>
<b>Sort by</b>	User Name <input type="text"/>
<b>Order</b>	Ascending order <input type="text"/>
<b>Number of members per page</b>	<input type="text"/>
<input type="button" value="Submit"/>	

**Figure 1. Search form**

The search results are presented in a table together with buttons to contact members via email, personal message, or to visit their website if they have one. Note that the “joined date” and number of posts is also displayed. Administrators may also edit or delete member accounts from here.

Search Members >>> Search results

Avatar	User Name	Real Name	Email	PM	URL	Joined Date	Last login	Number of posts	
	crushdepth		<input type="button" value="EMAIL"/>	<input type="button" value="PM"/>	<input type="button" value="WWW"/>	2003/11/16	2004/6/30 22:19	7	Edit   Delete
	JoeAverage		<input type="button" value="EMAIL"/>	<input type="button" value="PM"/>		2004/3/4	2004/3/4 20:28	0	Edit   Delete
